## MSA PremAire Cadet Escape Respirator

FEATURES

### PREMAIRE CADET ESCAPE RESPIRATOR

The PremAire Cadet Escape Respirator, a combination supplied-air respirator with escape cylinder, is designed to be versatile, comfortable, and affordable. A streamlined new design offers a first stage regulator and cylinder valve within one assembly, creating a very small size and profile that is less likely to snag when working in tight places. The economical PremAire Cadet Escape Respirator is a cost-effective respiratory protection solution for many industries.

- New one-piece cylinder valve and first stage regulator: Small size and profile. Regulator incorporates downstream design and dual springs for maximum reliability. Design shares many parts with MSA FireHawk SCBA.
- Pressure gauge is recessed into valve housing: Protects gauge. Reduces size and profile.
- Choice of cylinder hip placement allows workers freedom and versatility
- Two harness materials: Standard Nylon – ideal for chemical resistance. Kevlar – ideal in high-heat environments or in areas with potential for sparks.
- Shoulder support strap incorporates hose keeper; regulator hose stays in place close to body, reduces chance of snagging
- Standby mount for second stage regulator

5-min Aluminum Cylinder
